# Coming Together In The Fight Against Pneumonia & Pneumococcal Disease

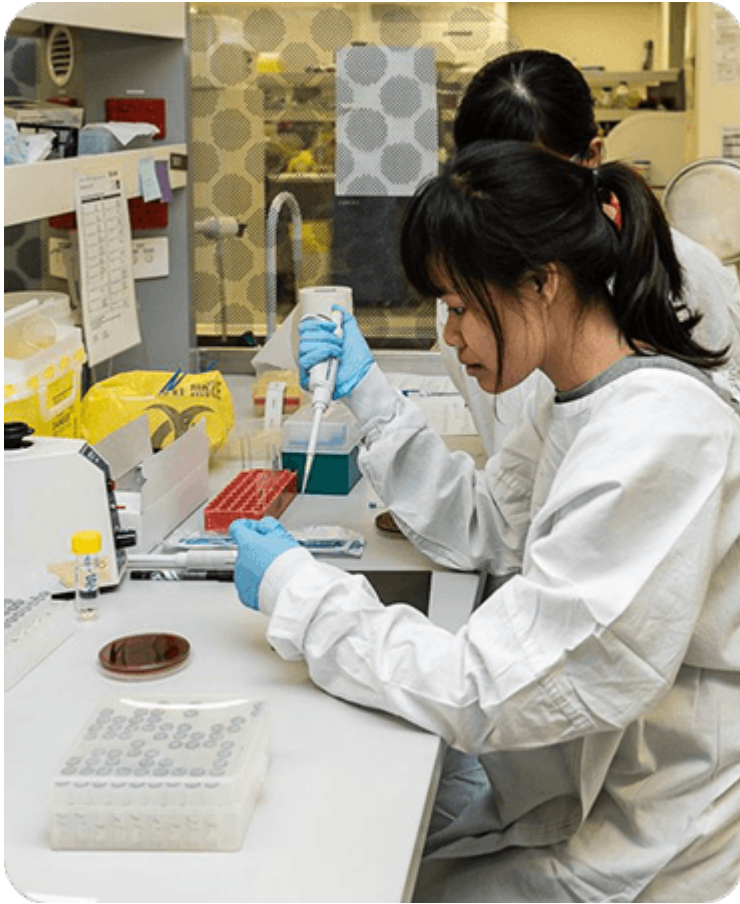

**ISPPD-13 | 17-20 March 2024 | Cape Town, South Africa**

The ISPPD Biennial Meeting is the premier global scientific event devoted to the exchange, advancement, and dissemination of the latest discoveries in basic science, microbiology, epidemiology, treatment, and prevention of pneumonia and pneumococcal diseases.

ISPPD provides an unparalleled international forum to bring together scientific, clinical, and public health experts,

practitioners, and students to present, discuss, challenge, and learn from the latest work and advancements on pneumonia & pneumococcal disease. Join us for ISPPD-13 in Cape Town, South Africa on 17-20 March 2024! [Secure Your Spot Here](https://www.isppd.com/ISPPD)

## Welcome Letter

## Why Attend ISPPD-13?

Enjoy the top forum for all researchers, medical professionals and industry representatives working towards the advancement of diagnosis, management and treatment of pneumonia and pneumococcal diseases. Don't miss on the opportunity to join

our global community and explore the latest medical advances, scientific discoveries and revolutionary research findings. Attend practical workshops, be part of stimulating discussions, network, collaborate and connect with international experts.

## Meet Us In Person

Be part of the global ISPPD community! Get to know colleagues from different cultures, share different perspectives, build strong, meaningful relationships and have some fun, whilst enjoying all that Cape Town has to offer!

## **Career Growth Opportunities**

ISPPD supports early-career professionals & outstanding contributions to the field through several awards and grants. The best way to advance your career and get valuable recognition is by submitting an abstract for ISPPD-13.

## International Community

Meet with world-renowned experts, researchers, industry reps, and peers from across the globe! Discuss new medical advances in the fight against pneumococcus and spark innovative ideas to improve patient care.

## Top Research & Science

The ISPPD 2024 scientific programme will feature the latest findings in the field of pneumonia & pneumococci. Improve your professional knowledge & skills by joining the scientific symposia as well as, the practical trainings.
